

## security frame - 31mm | round insert corners

Insert corners made from automotive grade UV stable plastic are available in a range of colours.

The inside frame snaps open to allow the poster to be changed - no special tools are required.

A durable injection moulded tool is provided which is used to open and close the Heavy Duty Security frame.

This frame is ideal for public places and high traffic environments and greatly improves poster security.

## snap frames

**Optional:** Heavy Duty springs enhance security, making it very difficult to open the frames by hand.

Frames are supplied with a rigid backing sheet and a non-reflective clear front cover as standard.
