

tamper proof frame - 40mm

poster frames

The Tamper proof frame does not open like other frames, but rather holds the poster behind a magnetised cover.

The magnetised cover is recessed and can only be opened using a suction cup (provided).

This ensures that the poster is well protected from vandalism and other interference.

The magnetised poster is also fitted with positioning tabs, ensuring that posters are easy to insert and change.

Tamper proof frames are available in standard and custom sizes, and can be wall mounted, suspended or free-standing.
